Anjaneya Inks and Coating

Colors That Speak, Coatings That Last.

Anjaneya Inks and Coating is a Telangana-based manufacturer of printing inks and industrial coatings. From our production house at Medchal we formulate offset, flexographic and gravure inks, overprint varnishes and protective coatings for packaging, publishing, commercial printing and engineering customers. Every batch is colour-matched in our laboratory, tested for performance and packed in our delivery unit - and with ready stock on hand, we welcome bulk as well as emergency orders.

About Us

A Telangana-based manufacturer of printing inks and industrial coatings.

Anjaneya Inks and Coating was founded with a simple conviction: that printers and manufacturers deserve inks and coatings that perform consistently, batch after batch. Our production house combines modern dispersion and milling equipment with the hands-on expertise of chemists and colourists who understand real press conditions. A dedicated colour laboratory matches shades to brand standards, and every batch is tested and traceable before it leaves our delivery unit. Backed by a well-stocked warehouse, we serve packaging converters, publishers, label printers and engineering companies - accepting bulk orders and emergency requirements with equal commitment.

Our Mission

To deliver inks and coatings that reproduce colour faithfully and protect surfaces durably.

Our Vision

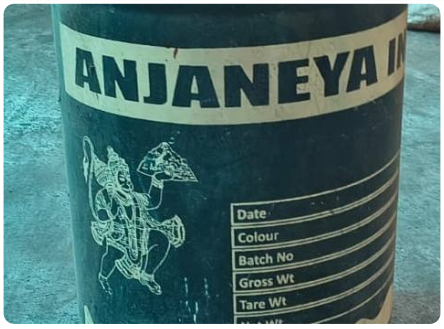

To be South India's most trusted independent inks and coatings partner.

Our Promise

Consistent shade, dependable performance, honest advice and delivery when you need it.

Our Inks & Coatings

A complete range of inks, varnishes and coatings - formulated, colour-matched and manufactured at Medchal.

PRODUCT 01

Offset Inks

Premium sheetfed and web offset inks with excellent gloss, fast setting and superior dot sharpness. Ideal for cartons, books, magazines, calendars and marketing collateral where vibrant, consistent colour matters.

PRODUCT 02

Flexo & Gravure Inks

Solvent-based and water-based inks engineered for flexible packaging, labels and laminates. Strong adhesion, high-speed printability and heat resistance for polyolefin, PET, BOPP and paper substrates.

PRODUCT 03

Industrial Coatings

Protective and decorative coatings for metal, wood and engineered surfaces. Formulated for corrosion resistance, weather durability and a finish that lasts through demanding service conditions.

PRODUCT 04

Packaging Coatings & Varnishes

Overprint varnishes, barrier coatings and heat-seal lacquers that protect printed packaging, enhance shelf appeal and comply with food-contact requirements.

PRODUCT 05

Custom Colour Matching

Pantone and brand-specific shade matching by our in-house colour lab. We deliver repeatable colour across runs, substrates and print processes with full batch traceability.

PRODUCT 06

Bulk & Emergency Supply

Ready inventory of standard shades and bases with a dedicated dispatch unit. We accept bulk orders and urgent emergency requirements with rapid turnaround across Telangana and beyond.

Standard Shade Card

Our own AIC codes. Printed colours are approximations - physical shade cards are available on request.

Process Colours

AIC-101 Process Cyan	AIC-102 Process Magenta	AIC-103 Process Yellow	AIC-104 Process Black	AIC-105 Dense Black	AIC-106 Opaque White

Spot & Brand Colours

AIC-201 Warm Red	AIC-202 Rubine Red	AIC-203 Rhodamine Red	AIC-204 Purple	AIC-205 Reflex Blue	AIC-206 Royal Blue
AIC-207 Leaf Green	AIC-208 Lime Green	AIC-209 Orange	AIC-210 Golden Yellow	AIC-211 Chocolate Brown	AIC-212 Cool Grey

Metallic & Fluorescent

AIC-301 Rich Gold	AIC-302 Pale Gold	AIC-303 Silver	AIC-304 Copper	AIC-305 Fluorescent Pink	AIC-306 Fluorescent Orange
AIC-307 Fluorescent Green	AIC-308 Fluorescent Yellow				

Coatings & Varnishes

AIC-401 High Gloss OPV	AIC-402 Matt OPV	AIC-403 Soft-touch Coating	AIC-404 Heat-seal Lacquer	AIC-405 Anti-corrosive Grey	AIC-406 Machinery Green
AIC-407 Safety Yellow	AIC-408 Oxide Red Primer				

Need a shade that is not listed? Our colour lab matches Pantone, brand & physical samples - call +91 94908 53292.

Production, Applications & Industries

How every batch is made, and where our inks and coatings perform.

01 Raw Material Inspection

Pigments, resins and solvents verified against specification.

02 Pre-mixing & Dispersion

High-speed dispersers wet out pigment for a uniform pre-mix.

03 Milling & Grinding

Bead and three-roll mills achieve fine particle size for gloss and strength.

04 Let-down & Colour Matching

Batch adjusted to target shade, viscosity and tack in the colour lab.

05 Quality Control

Draw-downs, proof prints and lab tests certify every batch.

06 Filling & Packing

Filled into 1 kg to 200 kg packs, sealed, labelled and staged for dispatch.

Applications

- Board Packaging
- Blister Packaging
- Self-Adhesive Labels
- Magazines & Brochures
- Flexible Packaging
- News Print
- Metal Decoration
- Industrial Surfaces

Industries We Serve

- Book Printing
- Pharma
- Personal Care
- Engineering
- Newspaper
- Food & Beverage
- Consumer Goods
- Marketing & POP

Ready to accept bulk & emergency orders

Standard shades and bases always in stock. Emergency top-ups dispatched within 24 hours.
